

Examiner-Initiated Interview Summary	Application No.	Applicant(s)	
	10/791,517	BRIGGS, DONALD J.	
	Examiner	Art Unit	
	Hugh B. Thompson II	3634	

All Participants:

(1) Hugh B. Thompson II.

(2) Mr. Michael Tavella.
Status of Application: non-final

(3) _____.

(4) _____.

Date of Interview: 8 September 2005
Time: pm
Type of Interview:

- ☒ Telephonic
☐ Video Conference
☐ Personal (Copy given to: ☐ Applicant ☐ Applicant's representative)

Exhibit Shown or Demonstrated: ☐ Yes ☒ No

If Yes, provide a brief description:

Part I.

Rejection(s) discussed:

Claims discussed:

1-17

Prior art documents discussed:

Miller-067, Beck-052
Part II.

SUBSTANCE OF INTERVIEW DESCRIBING THE GENERAL NATURE OF WHAT WAS DISCUSSED:

See Continuation Sheet
Part III.

- ☒ It is not necessary for applicant to provide a separate record of the substance of the interview, since the interview directly resulted in the allowance of the application. The examiner will provide a written summary of the substance of the interview in the Notice of Allowability.
☐ It is not necessary for applicant to provide a separate record of the substance of the interview, since the interview did not result in resolution of all issues. A brief summary by the examiner appears in Part II above.

Hugh B. Thompson II
(Examiner/SPE Signature)

(Applicant/Applicant's Representative Signature – if appropriate)

Continuation of Substance of Interview including description of the general nature of what was discussed: Applicant agrees to amend claims 1 and 8 to recite "at least one magnetic strip formed of a quantity of magnetic powder and a means for encapsulating said magnetic powder into said formed/rectangular headpiece", the recitation along with applicant's Amendment of 6-23-05 that now recites "a ladder as comprising" the headpiece and supports pivotably attached thereto, making the claims readable over the rectangular piece of Miller (sans a ladder) and the "ladder attachment" of Beck. Claims 5-7 will be amended to provide proper antecedent basis for "the quantity of magnetic powder".
